AmnioWellness

WELLNESS | PAIN | BEAUTY

AmnioWell – Trust Nature

DR. CHRISTOPHER DAVIS, MD, FACC

WHY DO YOU USE AMNIOWELL?

I originally used the product for a shoulder injury. My shoulder was bothering me for some time. I was experiencing poor range of motion and stiffness. AmnioWell(AF) has been used safely with no issues, so I felt it was worth a try. My shoulder pain was relieved quickly and I moved on to Wellness and longevity use. My workouts are better than ever, I'm sleeping great, and I am excited to see what the future brings for my patients and AmnioWell.

WHAT IS SIGNIFICANT ABOUT AMNIOWELL?

We know that most chronic diseases revolve around inflammation, or inflammation that has gone out of control, i.e. heart disease, dementia, autoimmune diseases, psoriasis on the elbow, irritable bowel syndrome, ulcerative colitis, and Crohn's Disease, these are all inflammatory processes that have gone astray, or autoimmune processes. Well, the beautiful part of a product like AmnioWell is we're now able to mitigate some of this inflammatory response, and so the sky is the limit for some of the things that we can potentially be treating with regard to using the AmnioWell product.

WHAT DO YOU THINK THE FUTURE LOOKS LIKE FOR AMNIOWELL?

Now, as I think about general wellness, we know that inflammation drives our aging process, so we can think about potentially using a product like AmnioWell even in things like

longevity protocols. Obviously, we've talked about things like the injuries and inflammation in knees and shoulders, that's almost a no-brainer simply because stem cells have been so effective in doing that before and we've talked about how actually, the active components of the stem cells are likely the exosomes and growth factors. So, that whole conglomeration of the cytokines, the chemokines, the proteins, the growth factors, that placental matrix, having the combination of all those that work together and are effective when they need to be, is what's important in this product.

"So one of the things we know about the differences between acellular growth factors like AmnioWell(AF) vs the stem cells and PRP therapies is that certainly the AmnioWell(AF) product is a much less invasive. We know that with some stem cell therapies we have to draw blood samples from our own hip or fat, Platelet-rich plasma (PRP) blood is drawn and then spun down. The injections from stem cell and PRP must be much more precise and exact to exacerbate their greatest effect, causing additional trauma to already injured areas. The AmnioWell(AF) product is isolated from amniotic fluid, harvested and isolated through FDA protocols, and the easily administered."

What is AmnioWell(AF)?

AmnioWell(AF) is a natural protein isolation which plays an emerging role in medicine today. This natural, sterile allograft is comprised of simple proteins and has shown no unwanted side effects with thousands of uses. AmnioWell(AF) is first donated at Cesarean section birth in U.S. hospitals, then simple proteins are isolated in an FDA monitored lab. Federal guidelines in combination with University studies govern the procurement and isolation of AmnioWell(AF). This natural, U.S. harvested allograft is isolated, tested, quantified and delivered from cryogenic storage. AmnioWell(AF), a consistent protein matrix, is comprised of exosomes, growth factors, cytokines, chemokines and high molecular weight hyaluronic acid. Structural tissues in each unit of AmnioWell(AF) may be used by physicians to protect and cushion, provide lubrication and modulate many bodily functions. Studies are underway involving the mitigation of pain and inflammatory response. Because AmnioWell (AF) contains such vastly distinguished properties, it may serve as an adjunct to numerous therapies.

AmnioWell(AF) is being testing in clinical trials to show a positive effect on cell signaling by providing exosomes, growth factors, cytokines, and chemokines derived from amniotic fluid. Many believe this is the key to the future of medicine.

AmnioWell is comprised of exosomes, cytokines, chemokines, and growth factors which are small, secreted proteins that affect signaling in a variety of cell types. Scientists around the world depend on these reagents for important applications in the activation, expansion, and differentiation of immune and stem cells.

Growth factors

Growth factor modulation of naturally occurring growth factors is generally considered to be a subset of cytokines, and refer to the diffusible signaling proteins that stimulate cell growth, differentiation, survival, inflammation, and tissue repair.

Cytokine modulation

AmnioWell hopes to positively effect cytokines, a group of proteins secreted by cells of the immune system that act as chemical messengers.

Chemokine modulation

Any of a class of cytokines with functions that include attracting white blood cells to sites of infection.

AmnioWell – Trust Nature

Cell signaling science

The goal is to send the signals that the body needs to positively influence cellular decisions. Cell signaling is the next wave in medicine. -DR ROBERT WILLIX, AUTHOR, DOCTOR, HEALER AND SHAMAN

EVs (Extracellular Vesicles) (Cellular signaling agents)

Extracellular vesicles (EVs) consist of exosomes, which are released upon fusion of the multivesicular body with the cell membrane, and microvesicles, which are released directly from the cell membrane. EVs can mediate cell-to-cell communication and are involved in many processes, including immune signaling, angiogenesis, stress response, senescence, proliferation, and cell differentiation. The vast amount of processes that EVs are involved in and the versatility of manner in which they can influence the behavior of recipient cells make EVs an interesting source for both therapeutic and diagnostic applications. Successes in the fields of tumor biology and immunology sparked the exploration of the potential of EVs in the field of regenerative medicine. Indeed, EVs are involved in restoring tissue and organ damage, and may partially explain the paracrine effects observed in stem cell-based therapeutic approaches. The function and content of EVs may also harbor information that can be used in tissue engineering, in which paracrine signaling is employed to modulate cell recruitment, differentiation, and proliferation. (*1)

We propose that extracellular vesicles (EVs) can not only act as delivery vehicles for growth factors in therapeutic applications, but they also represent a novel growth factor signaling pathway to affect therapeutic outcomes. EVs are present throughout the body and are involved in intercellular communication, locally and systemically, from early development onward, and across physiological and pathophysiological conditions. (*2)

How do the exosomes work?

Exosomes are simple proteins that help live cells communicate. The exosomes contained in AmnioWell(AF) may play a role in cell-to-cell signaling, influencing cells and increasing protein production. Transferring molecules from one cell to another, exosomes, from certain cells of the immune system may play a functional role in mediating immune responses to pathogens.

How does that work?

We know for sure there is signaling between a mother and its fetus, which assists with fetus development, but we are not quite sure exactly how it works. A possible analogy is to think of the womb as a construction site. The building materials are the growth factors. The exosomes are the workers. When in the womb, the exosomes (workers) and proteins including growth factors (building materials), may work together to build their project, your entire human body in an average of just 9 months. Simple amniotic proteins have shown promise in numerous studies. Viruses, infections, and immunity related disorders can be life threatening. Ailments including bone, tendon, ligament, joint, and organ pain are commonplace. Many ailments can leave people sick and uncomfortable. Issues that may be accompanied by pain. The inflammation that often causes pain may be your body signaling for help. Don't let nature's signal disappear into the void or be masked by drugs. Let all natural AmnioWell(AF) help to answer your body's call.

AMNIOWELL(AF)

AmnioWell(Amniotic Fluid) is an all natural acellular allograft intended for homologous use. An all natural AmnioWell(AF) 1ml treatment consists of exosomes (extracellular vesicles). AmnioWell(AF) also includes growth factors including anti-inflammatory cytokines and chemokines. Amniotic derived high molecular weight hyaluronic acid helps to complete nature's design.

ADMINISTRATION

AmnioWellness protocols are available at your convenience. Physicians are on call and ready to assist. AmnioWell(AF) can be quickly and easily administered by your physician at your desired location. AmnioWellness is fast, easy, and continues to exceed patient expectations.

ASSURANCE

AmnioWell(AF) is harvested in combination with university research then isolated, and sterilized in a FDA monitored lab. To date there have been no adverse reactions involving thousands of AmnioWell(AF) uses. AmnioWell(AF) contains no live cells and is comprised of only simple natural proteins. AmnioWell(AF) has over 10,000 safe uses.

ACCOUNTABILITY

AmnioWell(AF) contains numerous nutrients, trophic factors and defense proteins that provide a nurturing and protective environment for fetal development. Based on reports that AF has antibacterial, anti-inflammatory and regenerative properties, AF is processed by a novel method for use in clinical care.

Chemokine and Cytokine Profiling Plays a Crucial Role in Activating the Immune System

Chemokines

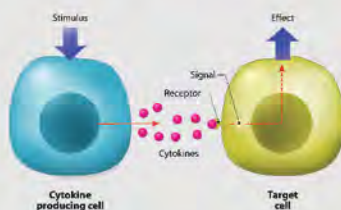

such as CXCL-1, GRO-alpha, IL-8 and others found in AmnioWell(AF) promote interaction between innate and adaptive immune systems, thus shaping and providing the necessary context for the development of optimal adaptive immune responses.

Cytokines or stimulus for Cytokines

such as IL-1ra, TNF-alpha, TGF-alpha, PDGF-BB, VEGF-a, EGF and others found in AmnioWell(AF) participate in intercellular communication and in many cellular and immunological functions. They are involved in inflammatory responses and defense against viral infections.

Cell Migration toward AmnioWell(AF)

The immune response against viruses is initiated through recognition of viral molecules. The Cytokine network against viruses starts with some

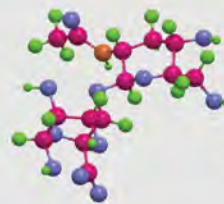

cytokines produced by virus infected cells inducing a potent inflammatory response, attracting and activating phagocyte cells (e.g. neutrophils, macrophages, dendritic cells), mast cells and Natural Killer cells, to the site of infection. Furthermore, these cytokines are involved in the induction of an immune response with the purpose of eliminating infected cells and extracellular viruses while other cytokines modulate the immune response.

Cytokine profile in bacterial infections.

Cytokines induce the expression of molecules cells promoting the recruitment of neutrophils and macrophages to the site of bacterial infection.

Cytokine profile in fungal infections.

Cytokines are activated inducing and stimulating phagocytosis of neutrophils and macrophages.

Hyaluronic Acid Regenerative and Healing Role

Hyaluronic acid (HA), is considered one of the key players in the tissue regeneration process. It has been proven to modulate via specific HA receptors, inflammation, cellular migration, and angiogenesis, which are the main phases of healing. High molecular weight HA found in AmnioWell(AF) displays anti-inflammatory and anti-oxidative properties which support the immune system.

PAIN

WELLNESS | PAIN | BEAUTY

Trust Nature - Live AmnioWell

What is the difference between acute and chronic pain?

Acute pain usually comes on suddenly and is caused by something specific. It is sharp in quality. Acute pain usually does not last longer than six months. It goes away when there is no longer an underlying cause for the pain. Causes of acute pain include:

Surgery • Broken bones • Dental work • Burns or cuts • Infection

After acute pain goes away, a person can go on with life as usual. Chronic pain is pain that is ongoing and usually lasts longer than six months. This type of pain can continue even after the injury or illness that caused it has healed or gone away. Pain signals remain active in the nervous system for weeks, months, or even years. Some people suffer chronic pain even when there is no past injury or apparent bodily damage. Chronic pain is linked to conditions including:

Headache • Arthritis • Injury • Nerve pain • Back pain • Fibromyalgia pain

People who have chronic pain can have physical effects that are stressful on the body. These include tense muscles, restricted mobility, a lack of energy, and change in appetite. Emotional effects of chronic pain include depression, anger, anxiety, and fear of re-injury. Such a fear might limit a person's ability to return to their regular work or leisure activities.

What is AmnioWellness Pain?

Natural protocols were developed to mitigate both acute and chronic pain based upon the patient's symptoms and needs. Physicians use AmnioWell(AF) in conjunction with other modalities in an attempt to alleviate pain.

About AmnioWellness Pain Treatment

AmnioWellness pain physicians work with patients to fortify their body to combat and overcome pain. Practitioners work with the body as a whole and repair the body to combat pain and illness. AmnioWellness pain physicians create a specific protocol of treatments for each patient and work with them until they are completely satisfied. In office treatments, take home therapies, physical training programs, diet and nutrition, vitamin and mineral supplementation, IV therapy, and nutritional counseling are just some of the tools that physicians may use.

AmnioWell – Trust Nature

NELLY GAL PA-C

WHAT HAS BEEN THE MOST PREVALENT USE OF AMNIOWELL(AF) AT YOUR CLINIC?

Wellness and back pain are the primary uses of AmnioWell(AF) at our facility thus far. Our patient's results have been nothing short of miraculous.

TELL US ABOUT SOME OF THE WELLNESS EXPERIENCES

Patients continue to tell me that their overall sleep immediately improves, stamina, vigor, and cognitive function. Sexual wellness protocols in combination with GAINSWAVE have also showed promise. We don't see many onetime AmnioWell patients. We have a higher end clientele that expect our products and protocols to perform. Our patients are into human optimization, and AmnioWell seems to be the pinnacle of these treatments currently.

PLEASE TELL US A LITTLE ABOUT YOUR PAIN MITIGATION PATIENTS AND PROTOCOLS?

As you are probably aware, back pain is widespread and nearly all Americans suffer from it at some time. Back pain can be debilitating and to this point, there has not been many options to mitigate this pain. Pain pills and surgery are common treatments, but I like to look deeper for my patients. People are looking for natural holistic treatments and organic healing. My patients expect more from me than outdated remedies. AmnioWell(AF) is a simple acellular treatment (no live cells), the product is made up of just simple proteins. I did my research, and thought AmnioWell(AF) could be the right choice for my patients. I was correct, patients have seen amazing results. From acute to chronic back pain, AmnioWell has delivered. Patients have noted almost immediate pain relief, and with continuing AmnioWellness protocols complete pain relief. I've had patients walk in with extreme pain on a scale of one to ten, a nine, and leave at a pain level of a two or three. As a physician, it makes you extremely happy to be able to really help people.

ADVANCED DIAGNOSIS

Diagnosis of the underlying conditions of pain and healing ensure that the patient's body is in top condition to heal. Physical and diet assessment, accompanied by initial patient blood work prior to treatment, confirm that your body is working with you to help you heal.

THERAPY

Therapy is an important part of the healing process. Functional issue correction and movement, each play a role in the body's ability to heal.

PETE TACCI

"I underwent multiple back surgeries and as you can see, endured significant pain. The success stories are very rare when you get into more than one back surgery, as most people know. I just wanted to be out of pain.

I used AmnioWell and for the first time in my life I can honestly say I am without any pain pills and I'm getting back to the gym - for the first time in about 15 years."

AmnioWellness PAIN

WELLNESS | PAIN | BEAUTY

Trust Nature - Live AmnioWell

**80% OF AMERICANS SUFFER FROM BACK PAIN
DURING THEIR LIFETIME**

MY FIGHT WITH CHRONIC BACK PAIN

Like a lot of us, my lower back pain started in my late 30's. My playing days were over, and I had this nagging tightness in my back that just wouldn't go away. When I worked out, it got worse. I went to the back orthopedic specialist to check it out and all they wanted to do was cut me. I've been through 35 surgeries and over 70 broken bones, no way I'm getting another surgery unless it absolutely necessary. The lower back L5-S1 pain kept getting worse and I was at my breaking point about 6 months ago. I scheduled an MRI. The pain was so bad I couldn't even drive myself to the MRI. Shortly after that, and before the results were back, I found AmnioWell. My first treatment was painless and took just minutes. I knew it was working because I didn't need anyone to drive me to see the orthopedic back specialist for my MRI results. The doctor quickly told me arthritis, herniation, and bulging disks were to blame for my chronic lower back pain. I was prescribed more pain pills and told to schedule a date for surgery. When he left the room, I snuck out. No way I'm getting a 36th surgery after I'm already feeling better. I went back for another all natural AmnioWell treatment and I'm feeling better than I have in years. The AmnioWellness protocols are easy to follow, my physique has improved, and my mind is sharper than ever. I use the product and the protocols for wellness and skin renewal - and I couldn't be happier.

I'M LIVING AMNIOWELL!

Bernie Kosar

AmnioWellness PAIN

WELLNESS | PAIN | BEAUTY

Trust Nature - Live AmnioWell

CHAD VAN HORN, PA-C

HOW HAVE YOU USED AMNIOWELL TO PROMOTE OVERALL WELLNESS?

I like to take a multicomponent approach. We utilize intravenous vitamins - high dose vitamin C and glutathione - which are very powerful antioxidants, and then we utilize growth factors, such as what are in the AmnioWell injection. The combination of these things modulates the immune system in a positive way and allows your body to have more resources to build its defenses - its host defenses. You're up-regulating your T-helper cells and you're up-regulating your natural killer cells. These cells will scavenge around and look for the things that don't belong there, like viruses and bacteria, and anything else. You're ultimately strengthening your host defenses, so you don't succumb to any infection, and if you do, the duration or severity of that infection is going to be significantly reduced.

HAVE YOU PERSONALLY SEEN RESULTS USING AMNIOWELL TO PROMOTE OVERALL WELLNESS?

I know for myself, months back, around fall/winter time, there was a virus that went around and just took everyone down, and most people were down for about a week. I missed a day - just a single day - out of this office. The very next day, I was back to seeing patients and feeling good. So, there is something to be said for keeping your immune system boosted up in a natural way with vitamins, minerals, intravenous therapy and growth factors, such as in AmnioWell.

WHEN DID YOU FIRST USE AMNIOWELL?

About a year ago, I sustained a cervical herniation through my C6 and C7 discs. I was in pretty tremendous pain. I lost a lot of range of motion, particularly turning to the left side. I did some physical therapy, chiropractic work and traction therapy, and then I also started doing some AmnioWell injections. About two months ago, I did my most recent one and since then, my pain has been significantly reduced. The range of motion is getting better, but it's still not 100%. I was going through periods where I couldn't sleep in certain positions without certain fingers on my left hand going numb, but now that's not happening. The progress is good. I'm looking forward to getting back to 100%, I'm probably 80-90% there. Pain level, if I pushed on it, was probably a three or four out of ten, especially with certain motions. Now, it's probably a one to two. I feel great and I am AmnioWell.

YOU MENTION THAT YOU USED AMNIOWELL FOR THE "TREMENDOUS PAIN" CAUSED BY THE INJURY TO YOUR DISCS, WHO DO YOU CONSIDER A POTENTIAL CANDIDATE FOR AMNIOWELLNESS PAIN THERAPY PROTOCOLS?

Anyone who has a chronic nagging injury, back pain, neck pain, knee pain, shoulder pain or any kind of nagging pain that just hasn't been able to be treated with other therapies, is a great candidate for AmnioWell.

IN YOUR OWN WORDS, WHAT IS AMNIOWELL THERAPY?

AmnioWell is harvested under FDA guidelines from elective cesarean birth mothers who have given their consent to donate their amniotic fluid. What's amazing about AmnioWell is that we have found that amniotic fluid contains growth factors and proteins. These are the proteins that help build that baby in roughly nine months. In addition to the growth factors and the proteins, there is something to the tune of exosomes which are the signaling molecules that basically direct the work of construction of creating new tissues. How that translates to therapeutic use is that you combine exosomes and growth factors, and all of a sudden you're going to up-regulate the body's ability to create collagen and elastin, rebuild tendons and ligaments, and strengthen bone and muscle. So, it's truly a regenerative therapy unlike anything we've seen so far, I mean this is cutting-edge medicine.

"There is something to be said for keeping your immune system boosted up in a natural way with vitamins, minerals, intravenous therapy, and growth factors, such as in AmnioWell."

AmnioWellness PAIN

KNEE PAIN CRIPPLED MY CAREER UNTIL AMNIOWELL KNOCKED OUT MY PAIN

HOW DID YOU FEEL BEFORE USING AMNIOWELL?

For the last five years, I've had pain in my knee. I had two ACL knee surgeries but could not turn the corner on recovery for my knee. No matter what I did, I just could not seem to get my knee better, which forced me into a situation where I felt I could not compete at the highest level that I needed to, so I decided to retire.

DID YOU TRY OTHER THERAPIES PRIOR TO USING AMNIOWELL?

I had two knee surgeries on my right knee which pretty much ended my UFC career. I just never got into the cage and felt confident enough. Going into the Octagon, confidence is king and I just never felt the confidence in my knee again. You know, I tried so many different therapies, using PRP, cell therapy - all kinds of different things that I used for my knee, but nothing really worked. To be honest, it would work for a little bit of time and then it would just always go back to how it was.

HOW WAS IT WHEN YOU TRIED AMNIOWELL?

When I tried AmnioWell for the first time, it was completely revolutionary for me because it was the first time I ever experienced having a treatment that felt amazing right away. Not only did it feel amazing, I felt like how I used to feel. I couldn't believe it for a while, but that is the power of AmnioWell.

HOW DO YOU FEEL AFTER USING AMNIOWELL?

My knee is getting a lot healthier. It's to the point where I'm getting a lot of bounce back into my foot and into my leg. It's giving me the power I didn't have before. You know, it's turning around and it's got me feeling so good that I'm feeling like I can make a comeback! I have AmnioWell therapy to thank for that, because it was to the point where my knee was so arthritic, it felt as if it was a sixty-year-old knee. You know, I've always waited for my knee to bounce back from ACL surgery, but it just never did and it seemed to get worse. Then, I started doing the treatment, and you know it turned around. It's been a blessing. It's been amazing, so I'm very thankful.

DO YOU HAVE ANY AMNIOWELL TIPS?

There are a few factors that you need to include to make your AmnioWell experience even more impactful and more powerful for your body. I like to do intermittent fasting coupled with a vegan plant-based diet. That works really, really good for my diet. It may not work for you, so find somewhere in the middle. Having the range to have a balanced diet is key and if you're more on the meat eating side, can help out a lot too. Exercise is another good thing that helps out with the whole cell mediation, which helps your body to just stay clean and boost AmnioWell.

ANYTHING ELSE YOU'D LIKE TO SHARE ABOUT YOUR EXPERIENCE WITH AMNIOWELL?

Since I've been using AmnioWell, I have not been sick, not one time, not even a hint of sickness, not even a little cough or cold - nothing. It just kind of feels as though it's overall just building my body bigger, stronger, and better. You know, before AmnioWell, if I ran too hard, I felt as if my lungs would get a little bit weak and it would take a little bit of time for me to recover, but now the recovery is so much faster and my breathing is so much easier, it's definitely AmnioWell. I'm trusting nature and living AmnioWell.

Trust Nature - Live AmnioWell

WENDY FINKELSTEIN PA-C

Hi, I'm Wendy Finkelstein and I'm a practitioner at the Liquivida Lounge located at the Hippocrates Institute. I'm an avid triathlete and I suffered a substantial shoulder injury that took me away from competition and training. My shoulder was very stiff and painful and unfortunately, it was not improving over a period of months. Doctors told me bursitis and a possible rotator cuff tear were to blame for my constant shoulder pain, and that I would probably need surgery. My lifestyle is not conducive to surgery. Is anyone's? So, I went a different route. I injected myself with AmnioWell(AF) about three months ago. The procedure was quite simple and took less than a minute. The product was shipped priority on dry ice. I thawed it and then drew it with a tiny 30-gauge .5 inch (often referred to as an insulin) needle and injected the area of pain. Being naturally a bit pessimistic, I wasn't 100% sold on what they told me, but I realized no adverse reactions have been reported in thousands of uses and gave it a try. The company told me the process would take 12 weeks or so, and that physical therapy and a healthy lifestyle were essential to get the most from the treatment. I'm happy to say that I applied myself to the AmnioWellness protocols and in about 60 days I was able to completely alleviate my shoulder pain. My muscle tone returned quickly, and I'm feeling better than ever. I would definitely recommend this product to anyone dealing with chronic or acute pain.

I'M LIVING AMNIOWELL!

AMNIOWELL AND CBD

WELLNESS | PAIN | BEAUTY

Trust Nature - Live AmnioWell

AmnioWell(AF) and CBD

Trust Nature. Both CBD and AmnioWell(AF) are natural forms of healing.

Experts believe that maintaining homeostasis is the primary role of the ECS system.

AmnioWell(AF) exosomes and growth factors are part of a team that builds all the systems of the body in roughly nine months including the ECS system.

You cannot take anti-inflammatory medications while on an AmnioWell(AF) treatment as inflammation is the signal that reveals which parts of your body need repair. Therefore, topical CBD has been shown to be an effective and beneficial adjunct treatment.

These functions all contribute to homeostasis, which refers to the stability of your internal environment. For example, if an outside force, such as pain from an injury or a fever, throws off your body's homeostasis, your ECS kicks in to help your body return to its ideal level of operation. Today, experts believe that maintaining homeostasis is the primary role of the ECS.

The ECS (Endocannabinoid System) has been linked to the following processes:

- Appetite and digestion
- Metabolism
- Chronic pain
- Inflammation and other immune system responses
- Mood
- Learning and memory
- Motor control
- Sleep
- Cardiovascular system function
- Muscle formation
- Bone remodeling and growth
- Liver function
- Reproductive system function
- Stress
- Skin and nerve function

"I love working with AmnioWell. It's so much fun seeing lives changed for the better!"

- Sylvia Susini

AmnioWellness | Opioids | Anti-Inflammatory

WELLNESS | PAIN | BEAUTY

Trust Nature - Live AmnioWell

Inflammation, NSAIDs, Opioids

Inflammation is a vital part of the immune system's response to injury and infection. It is the body's way of signaling the immune system to heal and repair damaged tissue, as well as defend itself against foreign invaders, such as viruses and bacteria.

Take some nonsteroidal anti-inflammatory drugs (NSAIDs) to reduce the inflammation and get better. This is often the medical response to relieve pain which may provide some short term relief but is basically turning off the body's first response to healing.

When inflammation becomes ramped and the systems of the body become misaligned it is called chronic inflammation. The result of the body being out of homeostasis is linked to certain diseases such as heart disease or stroke, and may also lead to autoimmune disorders, such as rheumatoid arthritis and lupus. A healthy diet and exercise can be the first line of defense against chronic inflammation.

AmnioWell strives to put your systems in proper alignment and tilt your body in favor of homeostasis and proper body function.

Opioids

Opioids have been used since ancient times in an effort to relieve pain. It has been proven opioids work. Attaching to receptors in the brain, opioids send signals that block pain, slow breathing and produce a generally calming and anti-depressive effect. Blocking a pain signal for too long can be a bad thing, as we are mitigating the body's healing mechanisms and causing both physical and mental addiction, but there is a time and place for opioids. Most people's journey back from a severe injury starts with pain mitigation and opioids. Pain mitigation through opioid use is commonly used for hospice patients. Physicians advise, don't take them unless you need them, and only take them for as long as you need them.

"Chronic shoulder pain brought me to AmnioWell. I'm happy to say It's been about 12 weeks since the initial treatment and I'm pain free."

-Dr. David Soria, MD

" I took the AmnioWell(AF) product pre and post surgery . I couldn't believe how fast my chest healed after my stroke and quadruple bypass. The nurse said I had "alien like" healing properties. Five days out of surgery I was home and walked three miles. The results were more than I could have ever imagined ! Thanks AmnioWell."

-Dr. David Koski, DMD

*Physicians recommend not taking pain medications or anti-inflammatories while utilizing AmnioWell(AF).

TRAINING TIPS

Nelly Gal PA-C is also an active NPC fitness competitor and is showcasing a simple AmnioWellness base exercise.

This is an AmnioWellness base exercise focused on alignment and full body strength.

IMPORTANT POINTS OF INTEREST

- Make sure the feet and toes are exactly straight.
- You may want to toe a line or place feet inside floor tiles. Exactly straight is important, as most individuals feet are rarely exactly straight in everyday life.
- Slightly bend the knee directly in line with your toes. Make sure the knees do not buckle. Do not let your knees ever extend past your toes.
- Please make sure the hips are in line with the knees and toes.
- Keep your back as straight as possible. Chin slightly down and hands extended out from the nose.
- The hands are taught not tense and the fingers are pointed directly at each other.

WHAT ARE THE BENEFITS?

Entire body alignment, similar to a chiropractic alignment, may be one benefit. In ordinary life, most people use the same muscles in the same ways over and over, relying on the stronger muscles that just keep getting stronger. If the body becomes unbalanced, you may be more susceptible to injury. Think about it, all the pulling over time leading to possible inflammation and injury. This exercise is based on ancient Tai Chi principles and is also considered a moving meditation. Take five minutes for yourself and give it a try.

This is the starting position and needs to be perfected before you move on to phase 2. Once you can hold this position for 30 minutes you may be ready to proceed.

AMNIOWELLNESS SKIN

Trust Nature - Live AmnioWell

AmnioWellness Skin:

AmnioWellness Skin includes many kinds of in-office treatments that physicians offer including, but not limited to needling, dermabrasion, face lifts, breast augmentation, tummy tucks, and any procedure that may induce scarring or inflammation. AmnioWell(AF) is immune privileged and currently under university study for its anti-microbial and wound healing effects. AmnioWell(AF) is widely used in hospitals for its positive effect on wound healing.

Treatments that have typically used PRP (platelet rich plasma), such as the Vampire Facial, can now be supercharged with exosomes and growth factors.

SKIN

AmnioWellness Skin therapy is a combination of in-office procedures and AmnioWell(AF) accompanied by nutritional counseling, hormone management, compounded holistic topical creams, and take home therapies. Patients have expressed results similar to face lifts in just one treatment. AmnioWellness continued protocols are encouraged with each treatment.

AmnioWellness Skin is a group of natural skin treatments based on each individual's personal skin goals.

Day 0

Day 30

SKIN RENEWAL

Physicians have used AmnioWell(AF) in an attempt to heal open wounds and burns. Patients have expressed extreme satisfaction with just one in-office treatment. Hospitals are currently using Amniowel(AF) in an attempt to quickly heal extreme burn victims.

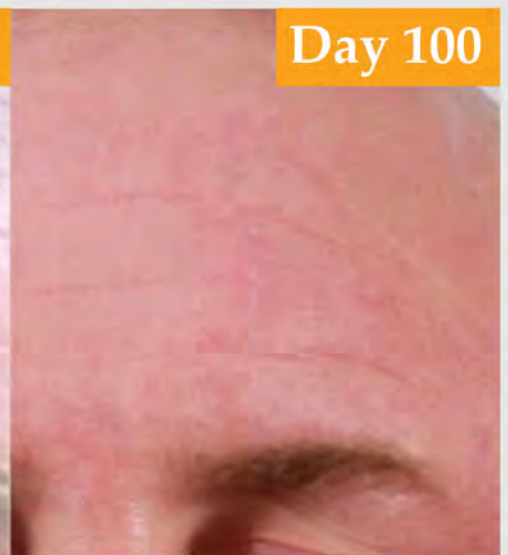

SCAR MITIGATION

AmnioWellness Skin therapies boosted by AmnioWell(AF) have exhibited the ability to diminish scars significantly. Both scars from birth and from recent injuries have shown major improvement. Scars may be greatly reduced in just one treatment.

Patients have reported diminished scars, eliminated sun spots, reduced wrinkles, and overall improvement in skin texture, elasticity, and appearance.

Day 0

Day 30

The AmnioWellness skin results were quick and there was no down time. I found the procedure non invasive and it caused very little discomfort. The procedure started with a facial and a 20 minute micro-needling session. My face was then wiped clean and the AmnioWell(AF) product was applied topically. There was an instant cooling sensation and the product seemed to quickly seal the open abrasion. My scars began to diminish quickly while my skin tone and texture seemed to freshen while in the office. My face was a little red that night but quickly improved just hours after the procedure. I'm 100% Living AmnioWell!

ELIZABETH FAGO

WHEN DID YOU BEGIN USING AMNIOWELL?

About four or five weeks ago, I was introduced to AmnioWell.

HOW DID YOU FEEL BEFORE USING AMNIOWELL?

I had incredible shoulder pain from a two-year bout of frozen shoulder. I had lower back pain at the end of every day. My lungs had been compromised, I had COPD, which has been very much under control through Cordyceps. I was getting a little tired at the end of the day which was really sort of unusual. I wasn't on top of my game.

HOW DID YOU FEEL AFTER USING AMNIOWELL?

I had a frozen shoulder and for two years suffered with a lot of pain. I received my first shot and had almost instantaneous relief. After my first dose of AmnioWell, oh and by the way I needed readers, I don't need readers anymore.

My shoulder pain is completely gone, my lower back is like I never had any problems, my lungs are oxygenating at 99, the clarity in my head is unbelievable, and my energy level is off the charts. AmnioWell is my Fountain of Youth.

Day 0

Day 14

PAULA COLOGGI

WHAT DID YOU THINK ABOUT THE PROCEDURE?

I was really expecting something More invasive. The procedure didn't hurt at all. The whole thing was painless. I was really excited that the micro -needling took less than an hour and I was right back to work!

WOULD YOU RECOMMEND THE PROCEDURE?

Absolutely , I saw immediate result and they just keep getting better. My friends say I look ten years younger and it makes me feel great.

"My friends thought I had a face lift! Just a little 30 minute microneedling procedure and my skin turned back the clock 10 years plus!"

AMNIOWELLNESS SKIN

WELLNESS | PAIN | BEAUTY

Trust Nature - Live AmnioWell

EMILY LEANDER

HOW HAS AMNIOWELL HELPED YOUR SKIN?

It's definitely helped my skin. I look ten years younger, I feel ten years younger, and I am just so happy with the results.

WHAT WAS YOUR SKIN LIKE BEFORE USING AMNIOWELL?

One thing was I definitely had a large cyst for many years on my face and it's finally going away. I don't feel any pain, any soreness, or any hardness there in my skin anymore. I had a pockmark from chicken pox and it has completely gone away.

HOW DO YOU FEEL AFTER USING AMNIOWELL?

Today, I sit here before you with no makeup on except lipstick.
I feel confident and vibrant.

Day 0

Day 100

"Dermatologists told me I was stuck with these scars for life. Thanks for proving them wrong AmnioWell!"

AMNIOWELLNESS HAIR

WELLNESS | PAIN | BEAUTY

Trust Nature - Live AmnioWell

AmnioWellness Hair Rejuvenation is a series of procedures and topical medications designed by physicians to replenish and reinvigorate your own natural hair. AmnioWell(AF) hopes to supercharge the hair growth and rejuvenation process.

ABOUT:

Patients are first screened by their physician to diagnose the reason for hair loss. The physician then proceeds with a plan to stop the loss and replenish all hair that was previously lost.

Microneedling, accompanied by the topical application of AmnioWell(AF), is typically the first procedure and consequently the beginning of hair growth. The second step of most hair rejuvenation protocols is the AmnioWellness hair spray.

AmnioWellness prescription spray acts as a preventive for hair loss and a fertilizer for the new and existing hair.

REASONS TO USE AMNIOWELLNESS HAIR:

AmnioWellness Hair Rejuvenation strives to invigorate your natural hair follicles. The process involves a simple in-office procedure, lasting less than an hour, administered once every 14 - 21 days. AmnioWellness continued protocols are recommended with each treatment.

1. MICRONEEDLING

Collagen induction therapy, also known as microneedling, or skin needling, is a cosmetic procedure that involves repeatedly puncturing the skin with tiny sterile needles. These tiny holes help the PRP uptake the AmnioWell(AF) into the scalp.

2. THE AMNIOWELL PRODUCT is applied to the open abrasion on the topical layer of the head, in an attempt to reinvigorate the follicles. AmnioWell(AF) is an amniotic allograft intended for homologous use. This simple acellular protein matrix is comprised of exosomes, growth factors, cytokines, chemokines and hyaluronic acid. These structural tissues may be used by physicians to protect and cushion, provide lubrication, and modulate inflammation. There are no live tissues or cells in AmnioWell(AF) just proteins. It's safe to say what creates the human body may be used to repair life.

3. AMNIOWELL has worked with pharmacists to develop an effective prescription topical hair growth product which has been clinically proven to stop hair loss, while helping to grow both existing and newly invigorated hair. Your doctor may also suggest natural remedies.

AMNIOWELLNESS HAIR

WELLNESS | PAIN | BEAUTY

AMBER QUINN

WHAT BROUGHT YOU TO AMNIOWELL?

My hair was thinning at the top like a lot of girls I know. My friend had used the AmnioWell(AF) product with success for pain, so I thought why not give it a try?

HOW WAS THE PROCEDURE ?

The procedure was quick and painless. The little bit of redness created was gone the next day. I was surprised to see baby hairs popping up within a week.

WOULD YOU RECOMMEND THE HAIR RENEWAL PROCEDURE?

Absolutely, my hair is seeing great results and I always feel so energized and positive the day after treatments. My immunity is also very strong. I have not even been a touch of sick since starting with AmnioWell.

One nice side effect I see is deep, more restful sleep after AmnioWell(AF) therapy.

DR. KENDRICK HEYWOOD

WHAT IS AMNIOWELLNESS SEX UTILIZING GAINSWAVE?

Think about it from a bodybuilding or muscle building perspective, the GAINSWAVE is theoretically the training and the AmnioWell(AF) is theoretically the healing. Train, heal, perform, and GAIN.

HOW LONG DOES IT TAKE AND HOW LONG DOES IT LAST?

Results can sometimes be immediate with AmnioWellness Sex treatment protocols. GAINSWAVE has been medically proven to provide patients with results for 2-3 years or longer with regular treatments. Results in combination with AmnioWell(AF) have shown significant and expedient results.

IS AMNIOWELLNESS SEX UTILIZING GAINSWAVE TREATMENT ONLY AVAILABLE FOR MEN WITH ED?

No, treatment is available for any man looking to enhance sexual health and performance. A medical condition does not have to be present for benefit. The AmnioWellness system is designed for maximum performance and satisfaction.

WHAT IS THE DIFFERENCE BETWEEN AMNIOWELLNESS SEX UTILIZING GAINSWAVE AND ED MEDICATIONS LIKE VIAGRA OR CIALIS?

This non-invasive treatment uses pulsatile sound waves in combination with AmnioWell(AF) to address the root cause which is poor blood flow. There is an increased

opportunity for spontaneity with your partner by not having to pop pills and plan for intimacy. Those with pre-existing health conditions like diabetes, high blood pressure or heart disease are safe to opt for treatment because there are little to no known side effects. The addition of AmnioWell(AF) hopes to provide additional healing in an attempt to achieve a faster and stronger result.

IS THIS NEW?

AmnioWellness Sex is the newest cutting edge sexual performance treatment. Although relatively new to the United States, GAINSWAVE (pulsatile sound wave or shockwave) therapy has been used as a successful treatment in Europe for more than 15 years. The AmnioWell(AF) product continues to exceed patient expectations. I have seen an amazing response with my patients at Health Gains utilizing this system.

HOW DO THE TREATMENTS WORK AND HOW MANY TREATMENTS ARE REQUIRED?

The number of required treatments depends on your symptoms and goals, results have been noticed with just a few treatments. AmnioWellness protocols have shown results within just a few sessions, the ability to train more and achieve faster long lasting results is the base of the AmnioWellness program.

WHAT ARE THE ADVANTAGES OF AMNIOWELLNESS SEX UTILIZING GAINSWAVE OVER OTHER "MALE ENHANCEMENT" PROCEDURES?

Treatment differs from other procedures for many reasons including, it is completely non-invasive, drug and surgery free. AmnioWell(AF) is all natural and comprised of simple proteins. The GAINSWAVE training sessions treat the root cause improving blood flow, providing long-lasting natural patient results. The AmnioWell(AF) aims to repair and strength the trained tissue.

The improvement in erectile function and overall sexual performance after treatment for men has been incredible. Thousands of men have reported:

- Enhanced Erections
- More Spontaneous Intimacy
- Increased Sensation
- Long-lasting Results
- Better Orgasms
- Overall Improved Sexual

SEXUAL OPTIMIZATION

AMNIOWELLNESS SEX

WELLNESS | PAIN | BEAUTY

Trust Nature - Live AmnioWell

AmnioWellness Sex is a comprehensive system hoping to provide increased blood flow, tissue development, and increased desire resulting in a better sexual experience. Lifestyle, health factors, and functionality are all taken into account.

AMNIOWELLNESS SEX PROCESS

There are multiple phases to the AmnioWell(AF) Sexual Optimization Treatment; diagnosis of the underlying condition, initial treatment, training, and regeneration.

PHASE 1 Diagnosis of why the sexual experience has not been 100% satisfactory is the AmnioWellness Sex physicians first order of business. Intensive blood work and examination confirms if your body has a hormone imbalance or a physical ailment. Diet and lifestyle conditions are then taken into account. Both desire and sexual function issues are explored.

PHASE 2 After the underlying cause is diagnosed, proper treatment protocols are introduced. Bio identical hormone therapy, lifestyle changes, and noninvasive therapies may be recommended. Most clients choose noninvasive sound wave therapy to improve erections and stimulate new tissue growth. Sound wave therapy is a clinically proven, noninvasive therapy, that was specifically developed for men seeking an erectile dysfunction treatment that would improve their sexual performance. GAINSWAVE utilized in this therapy is available for purchase and take home use. Consult your physician for details or contact AmnioWellness.

PHASE 3 The third phase of the AmnioWellness Sex treatment is AmnioWell(AF), an amniotic allograft intended for homologous use. This simple acellular protein matrix is comprised of exosomes, growth factors, cytokines, chemokines and hyaluronic acid.

JIM PELLETIER

WHAT BRINGS YOU IN TODAY?

About a year ago, I decided to go with P-shot and an amniotic fluid injection for ED. I'm not sure of the product they used, but it wasn't AmnioWell(AF). My results were not as good as I expected, actually there were not much results at all. So, I started looking into other products. I wasn't completely ok with putting something in my body that was not organic. Regarding organic and all natural, I try to eat as well as possible and do as much physical activity as possible. I practice yoga and try to live a natural holistic lifestyle. I went through cervical spine surgery, and I wasn't happy with the procedure or the result. The second shot of AmnioWell(AF) was like a dream. I felt an increase in the gym that was over the top, it felt like my hair was growing, I felt better, I had more stamina, I had a complete overall better quality of life - period.

WHAT WERE THE SEXUAL BENEFITS?

The first shot was not giving me any benefits, that is when I started asking more questions. Chad then introduced me to GAINSWAVE and AmnioWell(AF). From that point on

GAINSWAVE was amazing in relationship with the AmnioWell(AF). I think the AmnioWellness protocols boosted me back to a place where I wanted to be. As far as stamina goes, it gave me the opportunity to feel more comfortable about myself in the bedroom.

CAN YOU TELL US ABOUT YOUR IMPROVEMENTS USING THE AMNIOWELLNESS SEX PROTOCOLS?

WHAT WOULD YOU RATE YOUR SEXUAL EXPERIENCE 1-10, 10 BEING COMPLETE SATISFACTION?

1-10, I think I was a 1 or 2, there was not a lot of movement going on. Since then, night "woodies" are a lot more common on a nightly basis. Sometimes 3 to 4 times a night, something I haven't experienced in years. As far as sexually goes, I feel like I can say yes to walking into the bedroom with confidence instead of feeling like is this going to happen, is this going to work, am I going to be able to function?

HOW WAS YOUR IMMUNE SYSTEM BEFORE THE AMNIOWELL(AF) INJECTION AND HOW WAS YOUR IMMUNE SYSTEM AFTER YOUR AMNIOWELL(AF) INJECTION?

My immune system has been challenged, that is why I want to take the best care as I can of my body. I try to treat my body as best as I can, and this was another factor that allowed me to be able to say, if this product can help me what else can I help myself with? AmnioWellness gives me an added boost in my mind, body, and my soul to be able to become a better person.

CAN YOU TELL US ABOUT YOUR IMMUNE ISSUES? HOW OFTEN DID YOU GET SICK BEFORE YOUR AMNIOWELL(AF) SHOT AND HOW OFTEN DO YOU GET SICK NOW AFTER YOUR AMNIOWELL(AF) INJECTION?

I would get a flu and it would be really bad, I am going to say a couple times a year. I have been hospitalized several times because of it. In the past year, I haven't had the flu, I have been well. I have been AmnioWell!

WHAT OTHER BENEFITS HAVE YOU NOTICED AFTER YOU AMNIOWELL(AF) INJECTION?

Cervical spine pain has been the bone of my contention. Ever since cervical spine surgery, it is 24/7 that I feel it. AmnioWellness protocols and the utilization of AmnioWell(AF) have given me an opportunity to be able to work without being in constant cervical spine pain. I get massage therapy every week and even my massage therapist is like, what's going on? She said she can feel I am doing much better by the way she can move and manipulate my body. My range of motion has vastly increased, and I'm actually out of pain. I feel much better, I feel a lot more capable of being able to do anything I want without limitations.

GAINSWAVE SOUND WAVE THERAPY

WELLNESS | PAIN | BEAUTY

Trust Nature - Live AmnioWell

Men suffering from erectile dysfunction can have vascular problems affecting the vessels that supply blood to the cavernous bodies of the penis, resulting in a decreased ability to develop and maintain an erection. The result is an inadequate blood flow, followed by premature draining of an already reduced amount of blood from the cavernous bodies, meaning an erection is not achieved. Sound Wave Therapy for ED of this type has shown to be a highly effective treatment.

SOUND WAVES HAVE BLOOD VESSEL STIMULATING EFFECTS

Since 2005, cardiologists have proven that sound wave technology works in stimulating the growth of new blood vessels, leading to an increased myocardial blood supply. The same shock wave therapy is now being used for a similar effect on the blood vessels in the cavernous bodies of the penis. The shock waves are focused onto the area to be treated creating new blood vessels in penile tissue, enabling patients to achieve and maintain firm spontaneous erections.

POSSIBLE BENEFITS OF GAINSWAVE PULSATILE SOUND WAVE THERAPY

- Treats the cause, not just the symptoms
- Enables spontaneous erections
- Visible results within 3 weeks
- Offers proven clinical long term results
- Completely safe with no side effects
- Non-invasive, totally painless
- Triggers natural repair mechanisms by increasing blood flow
- Restores sex life with stronger, firmer, longer lasting erections
- 70%+ success rate
- Compatible with other treatments
- Increased sensitivity in female & male patients who have reported a more pleasurable experience

ED MEDICATION

ERECTILE DYSFUNCTION PERFORMANCE ENHANCEMENT

WELLNESS | PAIN | BEAUTY

Trust Nature - Live AmnioWell

PDE5 inhibitors and Viagra are both PDE5 inhibitors used for the treatment of erectile dysfunction (ED). A phosphodiesterase type 5 inhibitor (PDE5 inhibitor) is a drug used to block the degradative action of cGMP-specific phosphodiesterase type 5 (PDE5) on cyclic GMP in the smooth muscle cells lining the blood vessels supplying various tissues. These drugs dilate the corpora cavernosa of the penis, facilitating erection with sexual stimulation, and are used in the treatment of erectile dysfunction(ED). Sildenafil(generic Viagra) was the first effective oral treatment available for ED. Because PDE5 is also present in the smooth muscle of the walls of the arterioles within the lungs, sildenafil(generic Viagra) and tadalafil(generic Cialis) dilates those vessels, and are FDA-approved for the treatment of pulmonary hypertension. Increasingly, the wider cardiovascular benefits of PDE5 inhibitors are also being appreciated.[1] Relax the cells and bring the blood flow. Viagra (sildenafil) and Cialis (tadalafil) only work when you are sexually aroused. Shortly patented after Viagra, Cialis is prescribed in a lower MG and known to have less side effects than Viagra. Tadalafil (generic Cialis) has an advantage over Sildenafil (generic Viagra) and other PDE5 products in that it lasts for a lot longer 36 hours, compared with 4-5 hours for Viagra. Both products can be prescribed for daily use, and many men are benefitting from the added bonus of better blood flow and vasodilation.

(1)Tzoumas N, Farrah TE, Dhaun N, Webb DJ (November 2019). "Established and emerging therapeutic uses of phosphodiesterase type 5 inhibitors in cardiovascular disease". British Journal of Pharmacology. doi:10.1111/bph.14920. PMID 31721165.

DIET AND IV NUTRIENTS

WELLNESS | PAIN | BEAUTY

Trust Nature - Live AmnioWell

One common diet is intermittent fasting also known as intermittent energy restriction. It is an umbrella term for various meal timing schedules that cycle between voluntary fasting (or reduced calories intake) and non fasting over a given period. Noncaloric, and sometimes low caloric, drinks can be used during intermittent fasting, contrary to strict fasting which disallows fluid intake in some religious practices. Three methods of intermittent fasting are alternate-day fasting, periodic fasting, and time restricted feeding. Intermittent fasting may be similar to a calorie restriction diet. Amniowell(AF) recommends intermittent fasting as a very important at home protocol to help AmnioWell(AF) work with your body.

Intermittent fasting helps in cell repair and regeneration. By fasting, the cells begin to rest and repair, not making rash decisions but thinking about their next move. When cells rest, good things happen. All of our POSITIVE signaling agents have time to work. AmnioWell(AF), exosomes, peptides, growth factors, and hormones can signal positive changes at a cellular level.

There are many different types of diets or lifestyle eating plans. The key to diet is figuring out your own body. Some individuals find that calorie restriction works best for them while others find certain food restrictions work best. Consult with your physician and track your personal trials to determine what best suits you. Whatever the diet, we recommend fasting to accompany the use of AmnioWell(AF).

No matter what diet you consider, it needs to be rich in vitamins and minerals. Most vitamins need to come from food. This is because the human body either does not produce enough of them, or it does not produce any at all. Each organism has different vitamin requirements.

Dogs can produce, or synthesize, enough vitamin C for their own needs, but humans cannot and minerals are considered essential nutrients because acting in concert, they perform hundreds of roles in the body.

They help shore up bones, heal wounds, and bolster your immune system. They also convert food into energy, and repair cellular damage. Surging right now is the use of vitamin and mineral infusion therapy.

What is nutrient or infusion therapy?

Nutrient infusion therapy is a safe and effective way to receive your vitamins, minerals and other nutrients directly into your bloodstream. Treatment sessions typically last 30-45 minutes and will leave you feeling refreshed and energized.

What are the benefits of IV therapy?

Taking oral vitamins can only lead to a 30 percent absorption rate, which is not ideal for individuals who are not getting enough vitamins as it is. However, IV therapy allows nutrients to be rapidly absorbed into the bloodstream for maximum benefits. There are no major side effects to the treatment. Some people experience a cool feeling in the arm or a mineral taste in the mouth, but this is all normal.

Diet plays a huge part in every facet of health, whether it be injury repair, weight change, or wellness.
Please consult with your physician to determine the proper diet for your goals.

NAD IV THERAPY

WELLNESS | PAIN | BEAUTY

Trust Nature - Live AmnioWell

WHAT IS NAD THERAPY?

Nicotinamide Adenine Dinucleotide (NAD) is a metabolic coenzyme and is charged with the important job of structuring, repairing, and remodeling every cell in the body. These specialized enzymes require constant replenishment in the body. Unfortunately, drug and alcohol use or abuse prompt the human brain to reorganize, particularly on a cellular level. This process, known as neuroadaptation, is directly responsible for addiction related brain damage and depletion of neurotransmitters. NAD IV therapy is said to replenish the drained enzymes and target brain restoration.

HOW DOES THE NAD TREATMENT WORK?

NAD IV therapy usually requires one infusion per day for a period of ten days. A facility physician develops an individualized treatment plan for each patient, including the precise NAD mixture. At the beginning of each day, a trained nurse will insert an IV and begin to slowly infuse the NAD mixture. Withdrawal symptoms reportedly begin to subside in a matter of minutes.

It has been quoted by many physicians that even though NAD IV therapy still requires additional research and evaluation, the treatment itself does produce positive results among patients struggling with addiction. Furthermore, there is clinical evidence of brain tissue and behavioral positive changes during treatment of anti-aging, addictions and craving when utilizing NAD and Amino Acids.

Vitamin injections and take home therapy also available.

VITAMINS & IV INFUSIONS

WELLNESS | PAIN | BEAUTY

Trust Nature - Live AmnioWell

Vitamin and nutrient IV infusions are being used for a wide variety of health concerns. Vitamin and nutrient IVs have shown promise in boosting wellness and immunity. The 0 ml to 1000 ml bags contain a saline solution of sodium chloride and water. A typical IV infusion can contain:

- Thiamine HCL
- Niacinamide
- Riboflavin
- Pyridoxine HCL
- Dexpanthenol
- Leucine
- Isoleucine
- Valine
- Phenylalanine
- Histidine
- Threonine
- Methionine
- Typtophan
- Alanine
- Glycine
- Proline
- Serine
- Tyrosine
- Lysine
- Arginine
- Ascorbic Acid
- Glutathione

A vitamin C dose may be as high as 25 grams. Thats the same vitamin C as about 490 oranges or 1.5 average orange trees!

VITAMINS & IV INFUSIONS

WELLNESS | PAIN | BEAUTY

Trust Nature - Live AmnioWell

VITAMIN D

Vitamin D has always been known to promote strong bone growth, beyond this use it is also being explored for its effect on energy, mood, and immunity.

Vitamin D known as the so-called sunshine vitamin is different from other nutrients because it also functions as a hormone — a switch that occurs when your body absorbs the vitamin.

The liver and kidneys convert vitamin D (produced in the skin and taken up in the diet), into the active hormone, which is called calcitriol.

Vitamin D is fat-soluble, which means the body can only absorb it when consumed with foods that contain fat, like avocado, chicken, or peanut butter. People who have trouble absorbing fat may in turn be predisposed to a vitamin D deficiency, which can carry its own set of risks. Also important is vitamin D's role in helping the body get sufficient calcium and phosphorus. These minerals are critical for building and maintaining strong bones.

WHAT'S THE DIFFERENCE BETWEEN VITAMIN D2 & D3?

There are two main forms of vitamin D-vitamin D2 and vitamin D3 and the difference between them has to do with their chemical structure and the way they're manufactured. (1) Vitamin D3 is the natural form of vitamin D that the body makes from sunshine.

"You should all be considering this AmnioWell no question about it."

-BRIAN CLEMENT, PH.D., L.N.

GLUTATHIONE

WELLNESS | PAIN | BEAUTY

Trust Nature - Live AmnioWell

Glutathione is a tripeptide comprised of three amino acids (cysteine, glutamic acid, and glycine) present in most mammalian tissue. Glutathione acts as an antioxidant, a free radical scavenger and a detoxifying agent. It is a tripeptide, a thiol and a L-cysteine derivative. Glutathione has been the subject of over 90,000 medical articles.

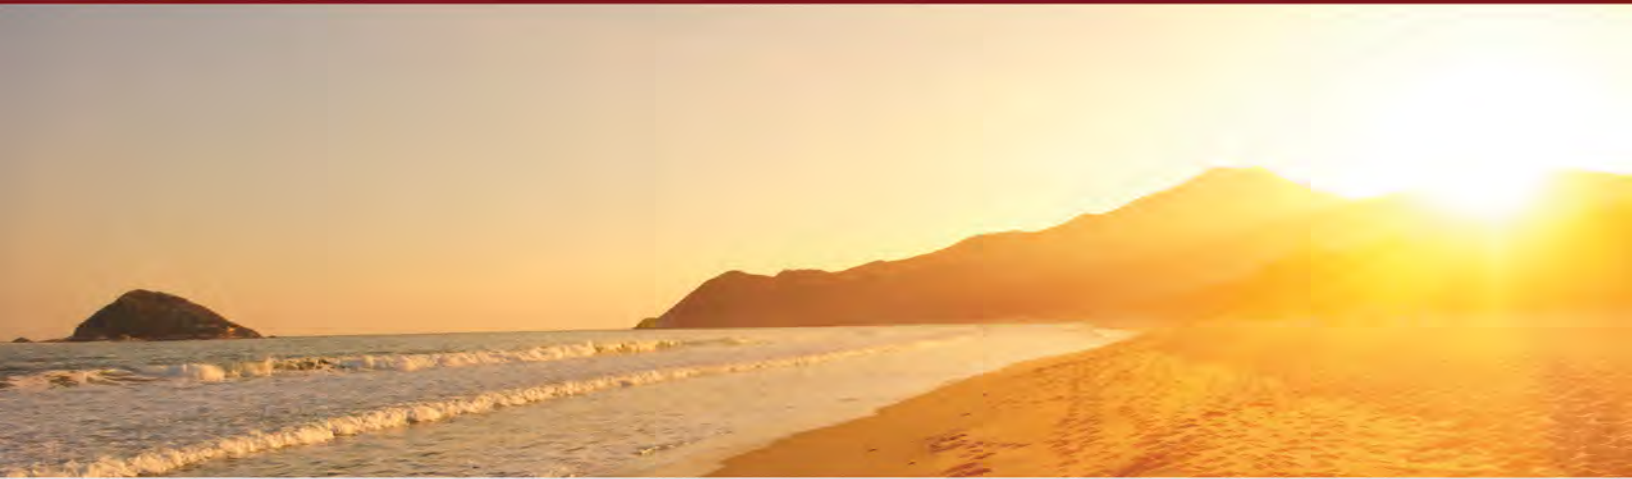

Glutathione is involved in many processes in the body, including tissue building and repair, making chemicals and proteins needed in the body, and for the immune system.

The good news is that your body produces its own glutathione. The bad news is that poor diet, pollution, toxins, medications, stress, trauma, aging, infections and radiation all deplete your glutathione.

GLUTATHIONE

WELLNESS | PAIN | BEAUTY

Trust Nature - Live AmnioWell

Some Glutathione benefits may include:

- May reduce oxidative stress
- May improve psoriasis
- May reduce cell damage in alcoholic and nonalcoholic fatty liver disease
- May improve insulin resistance in older individuals
- May increase mobility for people with peripheral artery disease
- May reduce symptoms of Parkinson's disease
- May help fight against autoimmune disease

Glutathione may also cause skin lightening by converting melanin to a lighter color and deactivating the enzyme tyrosinase, which helps produce the pigment.

HOW DO I RAISE MY GLUTATHIONE LEVELS?

Athletes and Hollywood celebrities have been getting glutathione IV infusions for some time. Glutathione IV infusions are showing to be a safe and effective way to uptake this anti-oxidant.

Exercise and a nutrient rich diet is never a bad idea, there are a couple specific nutrients that have been shown to raise Vitamin D levels including:

- N-acetyl-cysteine.
- Alpha lipoic acid.
- Methylation nutrients (folate and vitamins B6 and B12).
- Selenium.
- A family of antioxidants including vitamins C and E
- Milk thistle (silymarin)

HORMONE OPTIMIZATION

WELLNESS | PAIN | BEAUTY

Trust Nature - Live AmnioWell

MALE AND FEMALE SIGNS OF HORMONE IMBALANCE

The symptoms of a hormonal imbalance depend on which glands and hormones are affected. Symptoms associated with the more common causes of hormonal imbalances include:

- Unexplained weight gain or weight loss
- Unexplained or excessive sweating
- Difficulty sleeping
- Changes in sensitivity to cold and heat
- Very dry skin or skin rashes
- Changes in blood pressure
- Changes in heart rate
- Brittle or weak bones
- Changes in blood sugar concentration
- Irritability and anxiety
- Unexplained and long-term fatigue
- Increased thirst
- Needing frequent/infrequent urination
- Depression
- Headaches
- Bloating
- Changes in appetite
- Reduced sex drive
- Thinning, brittle hair
- Infertility
- Puffy face
- Blurred vision
- A bulge in the neck
- Breast tenderness
- Deepening of the voice in females

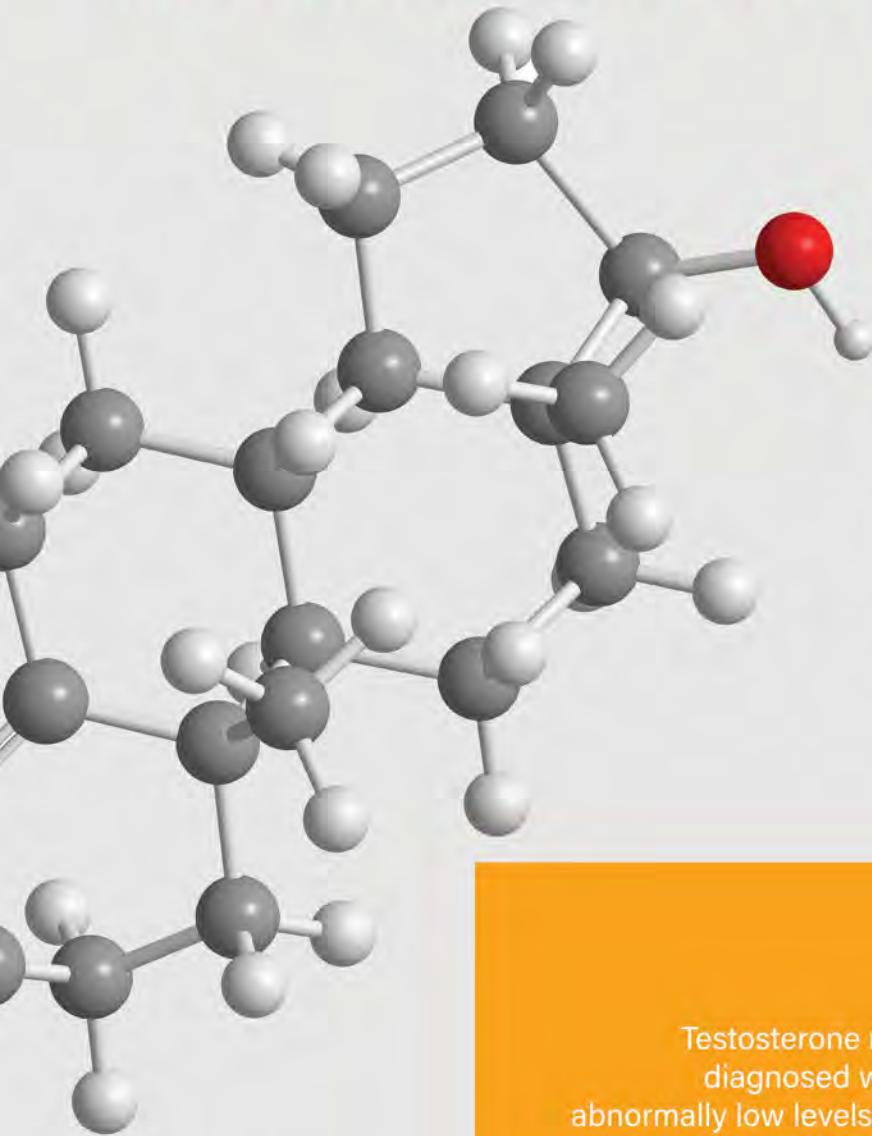

Your comprehensive blood work helps physicians dictate the right program for you. Each program is individualized. Physicians have noted that the majority of patients they see are hormone deficient. Hormone deficiency can cause depression and hurt the chances of a complete mental and physical recovery from injury.

HORMONE OPTIMIZATION

WELLNESS | PAIN | BEAUTY

Trust Nature - Live AmnioWell

LOW TESTOSTERONE(T) IN MEN & WOMEN

- Low sex drive. Testosterone plays a key role in libido (sex drive) in men & women
- Difficulty with erection
- Low semen volume
- Hair loss
- Fatigue
- Loss of muscle mass
- Increased body fat
- Decreased bone mass
- Mood changes
- Affected memory
- Low blood counts
- low energy

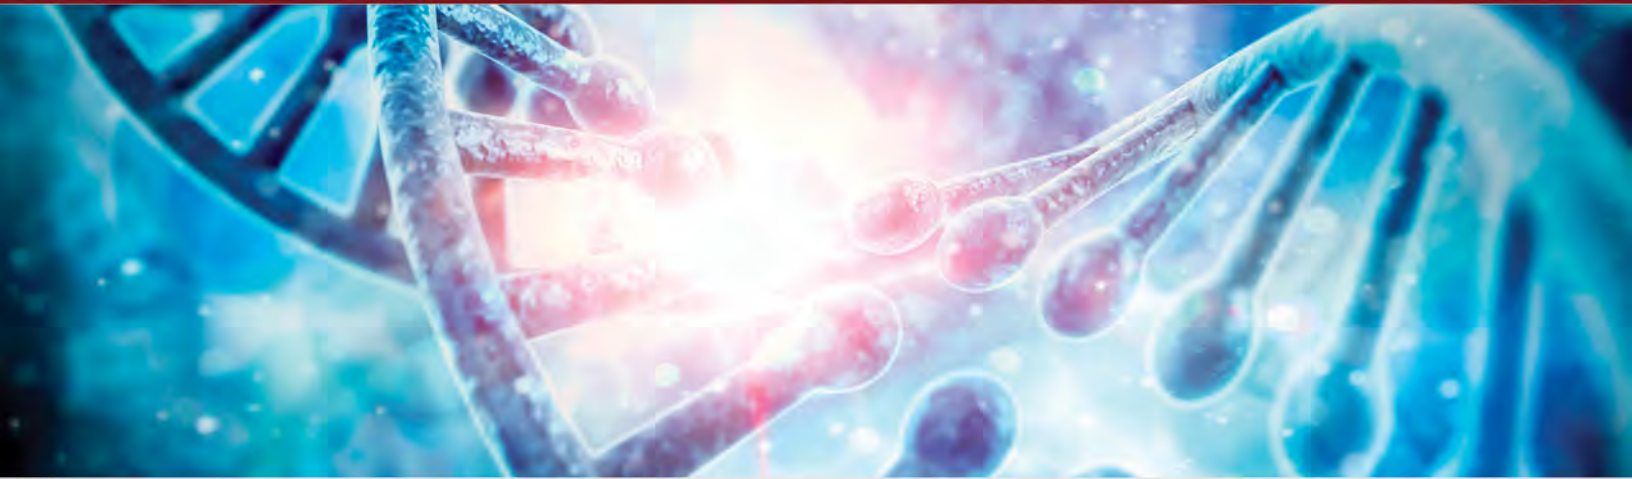

How is it treated?

Testosterone replacement therapy is used to help treat people diagnosed with abnormally low levels of testosterone. These abnormally low levels usually affect normal body functions, which can contribute to depression, decreased muscle mass and a lower sex drive, among other effects. For this treatment, testosterone medication or peptides are prescribed. Consult with your physician about a comprehensive blood test to see if you are a candidate for hormone optimization. Comprehensive hormone screening including your blood test is often covered by your insurance plan.

STEM CELLS

WELLNESS | PAIN | BEAUTY

Trust Nature - Live AmnioWell

	AMNIOWELL (AF)	AUTOLOGOUS STEM CELLS	ALLOGENEIC STEM CELLS
Procedure	Consistent recovery, processing, testing, and storage. Easily administered in the doctor's office.	Recovered from bone marrow aspirates, adipose tissue or peripheral blood.	Various recovery techniques, processing, testing and infusion. May require significant patient monitoring during and after infusion.
Contents	Acellular. Contains Proteins (Cytokines, Chemokines, Growth Factors), Exosomes, Hyaluronic Acid. Available in 1.0, 2.0 & 3.0 ml	Mesenchymal stem cells, cryoprotects, other preservatives that may dilute out the important functional contents.	Mesenchymal stem cells, other preservatives that may dilute out the important functional contents. Various tissue materials with unknown effects.
Recovery Time	Zero down time. Patient can go back to daily activities immediately, even increased activity.	Patients undergo the initial procedure to recover the cells, then scheduled at a later time to have the cells infused.	Patients may have to be hospitalized and monitored during and after infusion.
Risks	Mimimal, immunopriveleged thousands of treatments with no adverse reactions or side effects.	Potential reaction to cryoprotectants.	Potential immunity response or reaction to cryoprotectants. Unknown effects on patients.
Safety & Compliance	AmnioWell is recovered from C-section donors under FDA regulations 21 CFR 1271. Ongoing clinical trials are providing additional safety and efficacy profiles.	Varies by institution.	Varies by institution.

PRP (PLATELET RICH PLASMA)

WELLNESS | PAIN | BEAUTY

Trust Nature - Live AmnioWell

	AMNIOWELL (AF)	PRP
Procedure	Easily administered at home or in office under a physician's care.	This is an invasive treatment. 1. Blood draw 2. Spin blood in office, not in lab. 3. Doctor, nurse, or in some cases another individual extracts the platelet rich plasma from your blood. 4. Physician then injects a part of your blood back in you. 5. Physician charges you for shooting your own blood back into you with a needle.
Contents	Consistent- Billions of exosomes, growth factors including cytokines and chemokines. High molecular weight hyaluronic acid, natural from birth.	Inconsistent – Limited growth factors possibly
Recovery Time	Physicians have suggested immediate activity	Possible soreness from blood draw and injection site. May limit activity level.
Risks	There have been no adverse side effects reported with thousands of AmnioWell(AF) uses.	PRP blood draw intravenously can injure the patient. Possible contamination risk in preparation of the blood. PRP is routinely drawn in a quantity of 3-9 ML and administered intra-articularly by physicians.
Safety & Compliance	Sterile consistent AmnioWell(AF) contains no live cells. No adverse reactions have been reported in 1000's of uses.	Take your own blood and then put back in you.

PEPTIDES

WELLNESS | PAIN | BEAUTY

Trust Nature - Live AmnioWell

Peptide therapy is the targeted use of peptides to produce a specific reaction in the body. For example, some peptides stimulate the production of human growth hormone and are utilized in anti-aging therapies or to increase muscle mass. Peptides are typically administered through the skin as a subcutaneous or IM injection.

WHAT ARE PEPTIDES?

A peptide is a short chain of amino acids that are linked together and can be thought of as a small protein. In our bodies, these small proteins typically act as signaling molecules. They bind to receptors on the cell surface and tell other cells and molecules what to do. By attaching to receptor proteins on the surface of certain cells, peptides will stimulate how that cell responds to certain stimuli. There are over 7,000 known peptides in our bodies which direct an enormous number of different bodily functions ranging from hormone production, tissue and muscle repair, immune modulation, brain and central nervous system health, libido and sexual arousal, weight loss, inflammation reduction, DNA repair and aging and direct antimicrobial effects. Some common peptides are: AOD 99604, BPC 157, CJC 1295, IGF1, IPAMORELIN, MELANOTAN2, TESAMORELIN, and SARMS.

WHAT IS PEPTIDE THERAPY?

Peptide therapy, or the use of specific peptides in treatment, has gained great popularity in recent years due to its extraordinary high levels of safety

and uniquely specific effects. This can be compared to using hormone therapy, which has more generalized and broader effects. As of January 2015, there were over 60 US FDA-approved peptide medications, 140 peptide drugs being evaluated in clinical trials, and 500 in preclinical development. Most of these peptide drugs are intradermal, but can also come in the form of trans dermal creams, nasal sprays, sub lingual troches and oral tablets.

WHAT CONDITIONS IS PEPTIDE THERAPY USED TO TREAT?

Peptides are currently being researched and utilized in an attempt to improve overall wellness, as well as limit the effects of aging, inflammation, weight management, improving your libido, stimulating growth hormones, helping with anxiety and depression, joint and muscle repair, improving mental clarity and focus, insomnia, and more.

Peptides are similar to AmnioWell(AF) therapy as they both utilize the signals of the body. However, AmnioWell(AF) contains billions of signaling agents while most peptides are singular agents associated to specific reactions in the body.

AmnioWell(AF) vs Stem Cells vs PRP

WELLNESS | PAIN | BEAUTY

AmnioWell – Trust Nature

DR. RICHARD SILVA

"The amnio is 50-300 times stronger than platelet-rich plasma (PRP). The problem with platelet-rich plasma (PRP) is it works very well, we have been using it for years, but it is very limited in sculpt - so it will work for a while but you have to keep getting re-injected, whereas the amnio is basically a one-time treatment."

DR. CHRISTOPHER DAVIS, MD, FACC

"AmnioWellness Sex is the newest cutting edge sexual performance treatment. Although relatively new to the United States, GAINSWAVE (pulsatile sound wave or shockwave) therapy has been used as a successful treatment in Europe for more than 15 years. The AmnioWell(AF) product continues to exceed patient expectations. I have seen an amazing response with my patients at Health Gains utilizing this system."

DR. ROBERT WILLIX, AUTHOR, DOCTOR, HEALER AND SHAMAN

"You have to get to the cellular level, and the cells are talking to each other and when we get that language, then we're going to know how to teach the cells what exactly to do. So I think the field of platelet-rich plasma (PRP) and stem cells started the process, but I think the exosomes have more growth factors to signal the cell. I think cell signaling is the future, whether it is peptides, which signal the cell to repair or whether it is exosomes, which teach the cells how to regenerate. I think the future of healing is going to come with signaling the cells on what to do."

FAQ

WELLNESS | PAIN | BEAUTY

Trust Nature - Live AmnioWell

WHAT IS AMNIOWELL(AF)?

AmnioWell(Amniotic Fluid) is an all natural acellular allograft intended for homologous use.

ACELLULAR

Not made up or dividing into live cells

ALLOGRAFT

The transplant of an organ or tissue from one individual to another of the same species with a different genotype. For example, a transplant from one person to another, but not an identical twin, is an allograft. Allografts account for many human transplants, including those from cadaveric, living related, and living unrelated donors. Also known as an allogeneic graft or a homograft.

HOMOLOGOUS USE

"Homologous use" means that a human cellular or tissue product (HCT/P) is used clinically in a manner that is essentially the same as the natural endogenous function that it performed.

LEGAL

AmnioWell(AF), amniotic derived protein matrix is not classified as a drug, but as a tissue donation and falls under the (HCT/P's) Biologic code.

HOW IS THE AMNIOWELL(AF) PRODUCT SOURCED?

Amniowell(AF) is recovered from consented pregnant women who are scheduled to have a c-section. The women complete an Informed Consent and a Maternal Health History Questionnaire (similar to those completed for blood donation). A complete review of the donor mother's medical record is also obtained. Just prior to the recovery, blood samples are drawn from the mother donor and sent for all required infectious diseases.

HOW IS THE AMNIOWELL(AF) INJECTABLE QUANTIFIED AND TESTED FOR PURITY?

Amniowell(AF) is acellular. All the dead epithelial cells and insolubles are filtered out of the product. All the solubles (i.e., proteins- growth factors, cytokines, chemokines and hyaluronic acid (HA) are retained. Amniowell(AF) product is sterile filtered, and tested for proteins, HA, which meet a minimum standard. The product is labeled sterile and meets USP <71> standards.

"My neck is recovering really well from being broken and all I can say is that I am very impressed"

-ADEN STAY, HOLLYWOOD STUNTMAN

FAQ

WELLNESS | PAIN | BEAUTY

Trust Nature - Live AmnioWell

HOW DO DEAD CELLS CARRY EXOSOMES AND GROWTH FACTORS?

Proteins, growth factors, exosomes, and HA (hyaluronic acid) are not found specifically in the cells, but are found in the supernatant fluid. We verified this through our validation process. Please contact for our publication identifying proteins through a microarray analysis.

HOW HAVE EXOSOMES AND GROWTH FACTORS BEEN SHOWN TO BENEFIT THE RECIPIENT?

The anti-inflammatory and pro-inflammatory proteins, HA (hyaluronic acid), and specific growth factors are known to assist in the inflammatory cascade and healing.

WHAT IS THE DIFFERENCE BETWEEN EXOSOMES AND GROWTH FACTORS?

Exosomes are extracellular vesicles that are released from cells, and are responsible for intercellular signaling. This is important in utero between the baby and mother.

Growth factors are a naturally occurring substance capable of stimulating cellular growth, proliferation, healing, and cellular differentiation.

A growth factor is a protein or a steroid hormone. Growth factors are important for regulating a variety of cellular processes. Growth factors typically act as signaling molecules between cells. Examples are cytokines and hormones that bind to specific receptors on the surface of their target cells. They often promote cell differentiation and maturation, which varies between growth factors. For example, epidermal growth factor (EGF) enhances osteogenic differentiation, while fibroblast growth factors and vascular endothelial growth factors stimulate blood vessel differentiation (angiogenesis).

WHY IS THE COMBINATION OF EXOSOMES AND GROWTH FACTORS IN AMNIOWELL(AF) SIGNIFICANT?

As stated above, we believe cytokines, chemokines (recruiting normal cells), growth factors, and HA (hyaluronic acid) are all important components for reducing inflammation.

IS THE LAB THAT THE AMNIOWELL(AF) PRODUCT IS PRODUCED IN FDA INSPECTED?

Yes, the lab is registered and inspected by the FDA as a cGMP, and Human Cells, Tissues and Cellular and Tissue Based Products (HCT/PS) regulated under 21 CFR 1271.

WHAT IS THE FDA CLASSIFICATION PERTAINING TO THE AMNIOWELL(AF) PRODUCT?

The AmnioWell(AF) is classified as a HCT/P Biologic.

"The healing was immediate. You leave and you could go out the next day without a problem. It is painless, they do put numbing cream on, but I found the procedure painless. It is absolutely amazing to see the results, and they continue with time."

-LISA DEPACE

FAQ

WELLNESS | PAIN | BEAUTY

Trust Nature - Live AmnioWell

IS THE HARVESTING PROCESS FOR THE EVENTUAL AMNIOWELL(AF) PRODUCT FDA APPROVED?

Yes, under 21CFR 1271

DO YOU NEED ANY SPECIAL LICENSE OR PERMITS AS A PHYSICIAN TO UTILIZE THE AMNIOWELL(AF) PRODUCT?

No, physicians can use the product under their medical license ("Practicing Medicine").

WHEN WAS THE AMNIOWELL(AF) PRODUCT FIRST PRODUCED?

The product has been in research since 2013. It was first commercialized in 2015.

ARE THERE ANY PENDING LITIGATIONS INVOLVING THE AMNIOWELL(AF) PRODUCT?

No

HAVE ANY PATIENTS REPORTED PROBLEMS WITH THE AMNIOWELL(AF) THERAPY?

Thousands of patients have received the product with no reported adverse reactions or events.

DOES AMNIOWELL(AF) CONTAIN STEM CELLS?

We evaluated birth tissues for human mesenchymal stem cells (hMSCs). There are very few hMSCs in birth tissues. Our research has shown that the active or functional components in amniotic fluid are the proteins, growth factors, HA, and exosomes. We don't believe there are enough hMSCs to deliver a clinical dose, so we filter all cells out and therefore our product is acellular.

WHAT IS AMNIOWELL(AF)?

AmnioWell(AF) is a unique product which plays an emerging role in regenerative medicine. AmnioWell(AF) is a natural, sterile, protein rich, amniotic derived liquid. AmnioWell(AF) super fluid is harvested under FDA guidelines, then tested and quantified to consist of protein matrix, comprised of billions of exosomes, growth factors, cytokines, chemokines, and high molecular weight hyaluronic acid. The structural tissues in each unit may be used by physicians to protect and cushion, provide lubrication, and modulate inflammation. Because AmnioWell(AF) contains such vastly distinguished properties, it may serve as an adjunct to numerous therapies (i.e., pain, beauty, anti-aging, and wellness). There are no live tissues or cells in AmnioWell(AF), just proteins. With AmnioWell(AF), what creates life may be used to repair life.

"I would suggest if you want to start going forward with your injuries try the AmnioWell therapy, it is going to help"

-TERRY SCOTT SZOPINSKI, WWE LEGEND

FAQ

WELLNESS | PAIN | BEAUTY

Trust Nature - Live AmnioWell

WHO IS A POTENTIAL CANDIDATE FOR AMNIOWELLNESS PAIN THERAPY PROTOCOLS?

Anyone in pain, especially inflammation related pain, may benefit from AmnioWellness Pain therapies. Some common conditions treated by physicians include: osteoarthritis, knee pain, shoulder pain, nerve pain, back pain, hip pain, elbow pain, ligament injury, tendinitis/osteopathies, plantar fasciitis, slow & non-healing wounds/burns, and slow healing fractures.

HOW DOES AMNIOWELLNESS HAIR WORK?

AmnioWell(AF) in combination with other natural stimulants and topical medications, work synergistically in an effort to regrow hair from the root. The program stops hair loss and helps promote existing hair growth.

IS BALDNESS A SIGN OF HIGH TESTOSTERONE?

It is often said that bald men are more virile. The popular theory is that they have higher levels of the male hormone testosterone, which makes them more masculine and increases their sex drive, but they lose their hair at a younger age than average as a result. It is true that balding may be dependent on testosterone.

CAN LOW TESTOSTERONE CAUSE HAIR LOSS IN MALES?

Testosterone plays a role in several body functions, including hair production. Balding is a natural part of aging for many men. While there is an inherited component to balding, men with low T may experience a loss of body and facial hair, as well.

HOW HAVE AMNIOWELLNESS HAIR PROTOCOLS BEEN SHOWN TO WORK FOR MEN WITH HIGH TESTOSTERONE LEVELS?

Rejuvenation from the root is the key to AmnioWellness Hair. The clinically proven topical hair spray included with the procedure stops high testosterone hair loss.

WHAT NUTRIENT DEFICIENCY CAUSES HAIR LOSS?

Biotin (Vitamin B7) is another B vitamin that, when deficient, may be linked to hair loss

DOES VITAMIN E REGROW HAIR?

Researchers in one 1999 study found that high doses of Vitamin E increased blood flow to the eyes in people with type 1 diabetes. A separate 2001 study found that increased blood supply encouraged hair growth and increased the hair follicle and size in mice.

IS VITAMIN B12 GOOD FOR HAIR LOSS?

Although it is not as well documented or supported in research studies, a deficiency in this vitamin has been linked to hair loss. Hair requires a mixture of both vitamins and minerals to grow, and Vitamin B12 is one of the essential vitamins. The vitamin is required to produce new hair cells and promote hair growth.

"I love working with AmnioWell because I think it is a great product and I believe in being all natural"

- DANIELLE LOCKE

FAQ

WELLNESS | PAIN | BEAUTY

Trust Nature - Live AmnioWell

HOW DOES AMNIOWELL(AF) HELP DIMINISH SCARS?

The healing properties in AmnioWell(AF), such as growth factors and exosomes, have been utilized by physicians in an attempt to diminish scars. Various techniques used in combination with AmnioWell(AF) have been shown by physicians to help diminish the appearance of scars.

HOW DOES AMNIOWELL(AF) HELP REJUVENATE SKIN?

Skincare procedures including micro needling, laser therapies, chemical peels and microdermabrasion can all be super charged by AmnioWell(AF). The result can be improvement in overall skin quality, tone, and texture.

WHAT ARE SOME COMMON SKIN CONDITIONS THAT PATIENTS HAVE REPORTED IMPROVEMENT IN?

Patients have reported improvement in the following: scars/acne scars, pockmarks, moles, eczema, chronic dry skin, wounds, pigmentation, age spots, birthmarks, large pores, and more.

WHAT IS FUNCTIONAL MEDICINE?

Functional medicine is a form of medicine that focuses on the "root causes" of diseases based on interactions between the environment and the gastrointestinal, endocrine, and immune systems to develop "individualized treatment plans."

HOW IS AMNIOWELL USED IN FUNCTIONAL MEDICINE?

AmnioWell(AF) is a staple of functional medicine and has been shown by physicians to target inflammation leading to favorable results in many conditions. AmnioWell(AF) as used in AmnioWellness protocol is focused on whole body wellness for optimal healing, this approach is similar to that of functional medicine. Because AmnioWell(AF) contains such vastly distinguished properties it may serve as an adjunct to numerous therapies (i.e., pain, beauty, anti-aging, and wellness). This adaptability is ideal when administering treatment in the form of functional medicine.

WHAT IS AMNIOWELLNESS?

AmnioWellness is a group of treatment utilizing AmnioWell(AF). This includes AmnioWell(AF) Pain, Skin, Hair and Wellness.

WHY IS CORRECT HORMONE BALANCE IMPORTANT?

Hormones control every physiological process in your body, including metabolism, immune system, menstrual cycle and reproduction. A precise hormone balance is vital to proper body functioning.

HOW ARE HORMONES TESTED?

Your doctor will send a sample of your blood to a lab for testing. Most hormones can be detected in the blood. A doctor can use a blood test to check your thyroid, estrogen, testosterone, and cortisol levels.

"I had horrible lower back pain that ended my professional career. Within just a couple weeks after the AmnioWell(AF) injection, I can say that I'm 90% better. The lower back pain is gone. I'm living AmnioWell!"

-VINCE TAYLOR, IFBB PRO &
7X MASTERS MR. OLYMPIA

FAQ

WELLNESS | PAIN | BEAUTY

Trust Nature - Live AmnioWell

HOW WILL MY DOCTOR KNOW IF MY HORMONES ARE OUT OF RANGE?

There is a vast span between acceptable and optimized when it comes to testosterone. Please speak with your physician to find out what hormone level is appropriate for you.

WHAT ARE SOME SYMPTOMS OF LOW TESTOSTERONE?

In men, symptoms of low testosterone include: low sex drive, difficulty with erection, low semen volume, hair loss, fatigue, loss of muscle mass, increased body fat, decreased bone mass, mood changes, affected memory, low blood counts and smaller testicle size.

HOW LONG UNTIL YOU CAN GO BACK TO DAILY ACTIVITIES OR WORKING OUT AFTER AMNIOWELL TREATMENT?

There is little to no down time with the AmnioWell(AF) treatment. Most patients are able to go back to daily activities and working after the AmnioWell(AF) treatment. However, please follow the advice of your physician.

HOW LONG HAS AMNIOTIC FLUID BEEN USED MEDICALLY?

Over 100 years!

WHAT MAKES THE AMNIOWELL PRODUCT DIFFERENT FROM OTHER AMNIOTIC PRODUCTS?

AmnioWell(AF) differs from other stem cell and birth tissue products as it does not contain any live cells, just over 900 sterile proteins per mL. AmnioWell(AF) is a single donor sourced allograft harvested, isolated, and sterilized in a patented process. Another difference between Amniowell(AF) and other regenerative products is current studies and hospital use. Over 8 direct IRB studies are underway concerning AmnioWell(AF). Please contact for more information.

HAVE THERE BEEN ANY ADVERSE REACTIONS TO AMNIOWELL?

There have been thousands of uses of AmnioWell(AF) with no adverse reactions reported.

"I had pain in my liver for over a year which hospitalized me and almost pushed me to an early retirement. AmnioWell has me pain free and training for a show next year. I'm living AmnioWell!"

-YUMON EATON,
RISING BODYBUILDING STAR
