

AmnioBeauty Hair Regeneration

- Hair treatment may consist of one to many treatments or until the desired result is gained. Treatments are to be administered bi-weekly or at the physician's discretion (six treatments minimum are advised to achieve desired results, however the total number of treatments per patient is at the physician's discretion)
- 1mL AmnioWell product is to be applied topically per treatment
- Prior to treatment clean the scalp thoroughly.
- Treatment consist of micro needling the entire scalp and forehead. A combo treatment with face and head is often the best treatment.
- When the patient arrives to the office apply numbing cream so it sets in while they wait.
- Before micro-needling apply the scalp apply a serum (such as hyaluronic acid, PRP, or a combination).
- The Esthetician or physician may have their own technique.
- Skin or scalp is then wiped clean of any residual product or blood
- AmnioWell is applied topically or via injection at the physician's discretion

Additional information:

Please note that nearly every person thinks they are better looking and have more hair than they really have. Pictures are a mandatory part of this process. Be sure to take good before photos in the exact same place as follow up photos with the same light. A black background is best for these photos as it will highlight the skin or hair. Use a time stamp or a background that illustrates that the picture is original and from your location. People will think the pics are doctored. Make sure that the pre-treatment forms are filled out and then filled again at follow up appointments.

If you can get release forms signed so you can utilize the results in advertising. People love the results and are normally happy to let you share.

After my AmnioWell hair treatment I saw baby hairs growing within a week. It's been just a few months and I'm really happy with the progress. I had a very rejuvenating and restful sleep post treatment. The affect kept me energized for the week after, maybe more. I really feel the treatment had an effect on my overall wellness. Can't wait to get back for another session.

"I didn't notice it right away, but when I went back to the office the next month for a follow up, I definitely had a lot more hair."
– Gary

"My hair was always thin and 8 years ago I went almost completely bald. The AmnioWell(AF) product helped me to fix a scar on my face, so I was open to try it to regrow hair. The results were more than I thought possible!" – Erik
