

AmnioWellness Sex

Overview:

AmnioWellness sex is a process utilizing The GAINSwave pulsatile sound wave and AmnioWell(AF). In a bodybuilding analogy GAINSwave is the training and AmnioWell(AF), 900 proteins from birth, is the healing. Different modalities including prescription Viagra or Cialis type products, penis pumps, hormone optimization, or herbal Supplements may also play a role. Speak with your physician or download the Beyond Stems Cells magazine at AmnioWell.com for more info.

Pre Treatment:

- 1+ soundwave sessions

Post Treatment:

- 1+ More sound wave sessions
- All protocols must be weighed out over 12 weeks. Patients are not expected to have improvement before 12 weeks, but many do see improvement.
- All procedures are to be accompanied by AmnioWellness protocols.

Additional

AmnioWell vs PRP

AmnioWell and PRP may be used in a similar way. AmnioWell contains over 300 birth derived growth factors and billions of exosomes. Whereas PRP, provides approximately less than 10 growth factors that are as old as the patient. PRP's growth factors have been through the patient's life trauma but may still be beneficial. PRP injections are prepared by drawing one or more tubes of the patient's own blood and running it through a centrifuge to concentrate the platelets. These activated platelets are then injected directly into your injured or diseased body tissue. AmnioWell, however, is harvested from strictly tested and then qualified c-section births. The donated and concentrated fresh

amniotic growth factors and exosomes are quantified in a FDA approved lab under strict FDA guidelines. AmnioWell is consistent from birth, therefore, it renders consistent results.

You may experience a more vibrant deeper sleep, improved daytime energy, and more rapid healing from training. You may also experience tissue growth, firmer erections, and a more pleasurable sexual experience. Pay attention to your body and catalogue results for in writing or video about your journey.
